

'Our future is very dependent on the quality of our managers and leaders'. The training was extremely interesting and useful. The overall expectation from IIMK was of pure management training with various motivational dimensions. But two day sessions exceeded my expectations and has been brilliant in balancing of theory and practice. The infrastructure and the 'space' made available and created for larger and small group discussions, presentations, process of internalising the various aspects of assessment tools and techniques for kudumbashree including its visualization of growth and reach out in the next 20 years were all excellent including the inspirational faculties! Thanks for this unique experience and hope to implement it practically.
