

REPORT ON TRAINING AT IIM

Name :Dinesh.M

ADMC PALAKKAD

We reached the IIM campus in the night. The expectations about the programme was just mediocre. But found that the Programme was very much interesting and the faculties were very much involved in to the programme. Professor Priya Nair Rajeev started the Sessions . I felt that there was a mask between the faculty and the audience which was removed automatically by afternoon.

The 7 S frame work Discussed was useful and can be applied for a better management.

Questionnaire was distributed to the different groups formed and each group presented the TOPIC in the end it was an effective activity . One of the researchers , Miss, Simi Joy also joined in the afternoon as a faculty. The Major Highlight of the Second Day was Kudumbashree after 20 years in different aspects. Each group presented each areas assigned in a very effective manner.

MAJOR OUTPUT/IMPACTS

- The major out put was that all the Team members were seriously thinking of the changes that can be made in the system for an effective implementation of the Project.
- All the audience had a very effective introspection about the programme effectiveness.
- The group discussion helped every one to think about the importance of allotting some time to plan strategic movements in addition to the routine works.
- What can be done by each of us to improve the effectiveness of our time spent in the mission was another Key point we thought about.

The Programme was very good. The High light was the involvement of the faculties beyond their assigned areas.
