

Training conducted by CED during 21st to 23rd May 2018

Feed back

- **My Learning**

- Enhanced view of urbanization, its history, scope etc.
- Become familiar with the concept and practice of reform initiatives in urban settings in Indian context
- Brief knowledge of activities carried out by NABRD in the field of rural settings for the SHG
- Learned about the water and sanitation and its importance in Urban setting.
- Learned the activities of Swachha Bharatha Mission and its activities
- Experience about the e-governance applications of SBI, Indian railway, Akshaya, etc.
- Get an idea about the best practices in urban area development.

- **Suggestions Kudumbashree**

- The programs or training conducted by the CED team was not of any use, unless they are not correlating their topics with NULM. Their point of view is that this was just an orientation program so there is no need for correlation . This should be corrected with the SMMU's suggestions and input.

- **Feedback about the training**

- The training agency tried to provide best ambiance for a training. the accommodation, food, training, etc. Some of the trainers were also good .But they failed to prepare an effective curriculum and training method for the training. At the end it seems to be a simple beating around the bush

- **Suggest a project**

- Convergence of Swachh Bharath Mission(SBM) , PMAY and NULM may be practiced by using CLC as a centre of convergence .A construction team can be formed using the PMAY beneficiaries itself, who can undertake the works of PMAY houses and CLC can act as a role of contractor. The water and sanitation system can be linked with SBM. Livelihood creation can be done with the help of EST&P and SEP components of NULM.

Pridhvi Raj
City Mission Manager,
NULM CMMU-Alappuzha
