

Report on Capacity building at CED from May 21st to 23rd 2018

1. Learning

I could understand various programmes by central government for the urban development. I have a confidence to converge NULM with these missions

2. Feed Back

I could understand various aspects of urban development. But in the first day of training the session of NABARD , Confuse whether it will applicable in urban area. If it is possible it will be a achievement to urban people.

3. Weakness

The training hours are very less but the module is very large.

4. Suggestions

Kindly include the training module that can replicate in urban area.
