Gender Sensitization Workshop

Two Day workshop on

"Gender Sensitization" changed my view towards Women. The entire program was designed in such a way that each and everyone had the opportunity to speak and express their views.

Two trainers were qualified enough to understand the needs of the trainee and the activities were planned according to that. Role plays, group activities, Games & Quiz makes the session more interesting. Modules were more informative and understand my position in a male dominated society.

This training helps me to understand what are Roles women do in a Family & Society. Productive, Reproductive and Community Roles and the hard working effort a women are very informative.

The debate sections were more engaging and where informative. I had the opportunity to express my own views. During the training sections I understand why women are not position to address their needs. The problem is within them itself and the various condition in the society.

I had understood various approaches like welfare, Equality, Anti-poverty Empowerment and Efficiency that how a projects and programmes designed. I would suggest in the meeting Kadambari was on Anti-poverty chances to empowerment and looking process to equality.

Practical Gender Need and

Strategic gender needs was little bit confusing but I could able ^{understand} ~~enough~~ how it effects in male dominated society.

The training helps me to deeply understand why women empowerment is not ~~being~~ achieved in a full non-positive. Various factors affecting like traditions, family & society negative affect in growth of woman.

my suggestion is that this kind of trainings should be planned in the village level. A family get to know of each other should be called upon and the basic section of the trainings should be trained to community.
