

## Kudumbashree making Sanitizers in small quantities

The details about Kudumbashree units making cotton masks to prevent corona virus disease was explained in Making an Impact-206 and Making an Impact-209 articles. In addition to this, sanitizers are also produced under the leadership of Kudumbashree units and are distributed. As the availability of sanitizers became short in the market, the soap and lotion making units started making sanitizers.

As of now, sanitizers are available in Ernakulam, Idukki, Palakkad, Thrissur and Malappuram districts. The entrepreneurs with drug licence is produc-

ing sanitizer and selling them in the market. Those units manufacturing sanitizers using the spirit received from the Government is distributing the manufactured product free of cost (not for sale).

The general instruction is to wash hands using soap and water. So, we do not promote the use of sanitizers in households. It is better to clean the hands using soap and water. But in public places and offices, sanitizers are needed. Our small effort towards manufacturing of sanitizer is to address the shortage.
