

## Report

Sreeraj A.R.  
DPM Tribal Malappuram

2 days gender sensitisation program

Sree. Dercy Kappan & Sree Roshan were guiding the workshop.

All the sessions were interactive rather than a one way traffic of information which was very effective, convincing and interesting.

The workshop was designed in a wonderful manner so that every single member was able to contribute their part.

### Learnings

I was not very keen on the ideology of Patriarchy before the workshop gave a clear idea about this. And I came to realise that gender inequality is not something we see at workplace

or society but a life long experience which women & men both go through. And the road to gender equity starts from simple personal needs at your home to understanding the biological, psycho & physical & social needs and difficulties of every single person.

\* I believe this was the first time we had a proper training session with a clear objective and the objective was achieved to the most level possible within the timeframe. Looking forward to see more opportunity.

\* The wisdom I got from this program can not be expressed in a few words. I hope it reflects in my further actions. I thank every one who helped to arrange this.
