

## Minutes of the NULM programme reviewed in State PRM conducted on 7<sup>th</sup> December 2018

The Programme officer (Urban) reviewed the progress of NULM activities in ULBs component wise. The targets and achievements of ULBs were presented and highlighted the areas that need the attention of DMCs in achieving the targets in a time bound manner.

The major decisions taken are

### 1. Social Mobilization & Institution Building

The objective is to achieve 100% inclusion of urban poor into the Kudumbashree network. There are 231022 urban poor families who are yet to be covered into the network. The objective is to form 12037 NHGs to include them. The target is to form **4000 NHGs** in the **current year** and the remaining by the next financial year. A **sensitization** to include all the poor should be given to **the CDSs** to include all the **eligible members** into the Kudumbashree network.

### 2. Self Employment Programme

As per Sparsham campaign 43577 persons expressed their desire to start enterprises. The screening will help to identify only the required persons. The focus of the current year is to set up 1200 enterprises. There are around **400 applications in banks pending** for more than 3 months. The **DMCs** should present it in the **DLBC meetings** and take steps to **clear all the pending applications** in banks.

Similarly the Mission focuses on setting 8 initiatives in all ULBs so that volume in similar sector may be achieved. The 8 service sector enterprises have good scope in ULBs and the **DMs** may take steps to provide **necessary skill training support** and **handholding** to achieve the targets.

Reverse Osmosis plants is another target in SEP. As per the co-ordination committee decision the **Additional Chief Secretary (ACS)** has entrusted Kudumbashree to establish **50 RO plants** across the ULBs. Many ULBs are willing to start the plant but need support at the field level.

To promote SEP in ULBs the Mission conducted a **product/ service gap analysis** in ULBs, to identify the various products & services required for the community. **38 ULBs has not submitted** the report. The **districts may follow up** and take steps to submit the report.

The Mission will focus on setting enterprises in the identified products & services. The beneficiaries identified through Sparsham will be linked with the requirement.

3. Employment through skill training & placement

The target for the component is to enroll and provide training to all the aspirants for wage employment complying the EST & P norms.

The focus of the Mission is to assess the local level requirement of various skills and to provide training in these required sectors so that 100% placement can be ensured along with providing quality services to the local community. The Mission conducted **skill gap analysis** with this perspective and is in the process of consolidating the report. **46 ULBs yet to submit the report and DMs may ask the concerned City Mission Manager to submit the same.**

4. City Livelihood Centres

Establishment of 40 CLCs is the target of the year. The DMCs may converge the **establishment of marketing centres or CFCs with the CLCs** so that the **financial support** to establish the same may be **met from NULM**. The DMs may focus on this component and take steps to start CFCs that will meet the targets at both ends.

5. Recognition for Prior Learning (RPL) training for street food vendors

The street food vendors will be provided training to improve the quality of their product & service thereby providing certificates that can be used for further development. Like availing loans, wage employment etc. The DMCs may take steps to identify Kudumbashree street vendors so that they can be taken to the next level.

6. Shelter for Urban Homeless & Support to Street Vendors

The construction of shelter homes and vendor markets are going on. 2 vendor markets proposals one in Kasergode and another in North Paravur got approved and will be operational soon.

7. Vacancy of COs

There are vacancies of COs in the districts of Alappuzha, Ernakulam, Kozhikkode(1 each), Thrissur & Malappuram (3 each) and Palakkad (6). The **DMCs should take steps to fill in the vacancies as early as possible.**

8. SPARK ranking

The GoI has entrusted a bench mark to assess the performance of all states in the implementation of DAY- NULM programme. There are certain parameters to assess each component of the programme. The ranking will be done based on the criteria and the MIS entry made every month. The Mission came in the third position last year and is targeting to come in the first two positions this year. The **DMCs should monitor the MIS entry process of MTPs** and ensure that all the details are entered in a time bound manner.

9. Sparsham follow up

**The focus of NULM in the next three months is to achieve**

1. 100% linkage
2. 100% live NHGs
3. 100% RF to NHGs & ADSs
- &
4. 100% grading of NHGs

**The DMCs should take steps to achieve the target of Kudumbashree Mission in grading, linkage and strengthening of NHGs as part of the Year of NHG campaign.**
