Report on Gender Sensitivity-workshop conducted at
Maria Rani Centre Trivandrum.

Gender sensitivity encompasses the ability to acknowledge and highlight existing gender differences, issues, and inequalities and incorporate these in to strategies and actions. Things that I liked in the workshop are the content presentation course materials, distributed and the participatory methodology they used. This workshop allows us to examine our personal and professional lives from a gender perspective is likely to effect some degree of changes in our understandings beliefs and values. This training was a joint learning process for us as facilitators, this helped me to change my mind set and view things from a different perspective, and to modify behaviours remains as challenge.
